## Plan Description

Classic Mediterranean styling is accented by a tasteful blend of textures on this 2,112 sq. ft., 1-story house plan. Stout columns stand at attention on the covered front porch and act as a centerpiece of the home's curb appeal. Inside, guests are treated to open views throughout much of the home's living space.

Ceiling details and elegant columns define the outer boundary of the formal dining area, which lies just off the entry. Additional columns and arched detailing beckon entry into the great room, with its corner fireplace and built-in entertainment center and bookcases. The kitchen and breakfast area lie open to the great room and feature an island workspace and a walk-in pantry. From this area, a rear deck with built-in hot tub is accessed. A few steps from the kitchen can also lead to a generously sized laundry room with counters and soaking sink. Just outside the laundry room, a mud area with built-in bench and coat closet offer access to the home's 3-car garage. The master is situated for privacy and designed for comfort. The bath area features two separate walk-in closets, dual sinks, compartmented toilet, shower and an opulent soaking tub, set between elegant columns beneath a barrel-vault ceiling.
